## **Description of the product**

### **Jetset ESL**

Jetset ESL connects English students from developing countries to native English speakers through online cultural immersion, in person cultural immersions and in person/ online teacher training.

Women and children who do not have access to English education find that this prevents them from being accepted into universities, limits their opportunities to get good paying jobs at home or abroad, and inhibits their ability to understand people of different cultures.

Jetset ESL is going to use interactive English courses to help close the disparity gap for English education in these parts of the world.
