Springfield , VA

Re: VION/ Hitachi Federal Response

VION Corporation is pleased to have the opportunity to respond to NGA's Disparate Data Challenge initiative. ViON is responding in tandem with our long-time partner in the public sector, Hitachi Federal with whom we have supported the DOD and IC for +25 years. Our response to this Challenge is detailed in the attached White Paper that outlines how Hitachi Content Intelligence (HCI) can provide a federated, scalable and service based framework which offers an improved Geospatial and non-geospatial data storage solution.

Name: VION Corporation /Hitachi Federal
POC: Dan Dranginis (dan@vion.com)
PH: 301-318-3838

Access to the HCI solution set and/or a demo is available by contacting Mr. Dranginis. HCI is a working generally available solution that can perform the necessary functions as detailed in the attached submission.

Thank you for your time and consideration in this matter.

Sincerely

Dan Dranginis
