### **Product Description:**

**Healthbloks Care Manager** allows patients to store, access, manage and disseminate the information, appointments, and other pertinent healthcare information for not just a single family member, but for any family members in their care group, and not just for a single doctor, but for all the medical providers in their network or access group. Healthbloks Care Manager, securely allows patients and physicians to share pertinent healthcare information between families assigned to a specific care group, to allow for better understanding for caregivers of treatments for patients, a more accurate and complete healthcare family history and greater efficiency during appts by centralizing data for auto filling intake paperwork.
