

Exuberant Plaza

The intentions of this San Francisco Federal Building plaza proposal is to create a contemporary public space which forms a welcoming site for the community for San Francisco. This plaza will invite people to hang out, eat, play, and have a good time. There are a total of four hills people can gain access to. Two of the four hills have a very slight slope and the other two have a slope of .6%. There are tables and chairs as another sitting option for people. Anyone can walk into the plaza from the sidewalk. This plaza will be an opportunity for people to interact with each other as well as meet new people.
