

A PRIVATE ENTERPRISE UTILITY
for
ELECTRONIC PATIENT OUTCOMES MANAGEMENT

Care Rx

- Care RX can be launched on any mobile tablet running IE-10 and higher as well as Firefox, Google Chrome and any iOS device using the Safari browser.
- Allows Data access and aggregation of...
 - Medication Profile
 - Labs
 - Available Sessions and Session History
 - Appointments
 - Allergies and Disease Profiles
- Medication Profile shows patients Proportion of Days Covered (PDC) and their Medication Possession Ratio (MPR)
- Patients can export the data in a CCD-A which is the document required to support Meaningful Use in Healthcare.

Care Rx Utility

“A patient-centric portable, interoperable electronic patient outcomes UTILITY directly connecting the patient with their healthcare providers and payers”

The screenshot displays the Care Rx Utility mobile application interface. At the top, a dark header bar contains the 'RX' logo with a heart icon on the left and a welcome message 'Welcome TRACY HILL, PDX SOUTH DEMO # 1, Fort Worth, TX' on the right. Below the header, the 'Patient Information' section is visible, with the patient's name 'CAROLE UNIS' on the right. The 'Sessions' section follows, showing a list of 4 items with columns for Program Name, Last Session Issued, Last Session Completed, and Due. The 'Medications' section is at the bottom, featuring a filter by medication name, a table with 7 items, and columns for Medication Name, Frequency, Last Filled, Last Sold, and Dispensed Qty.
