Calliope Waterworks is an Internet of Things smarthome company that has built the first whole house water manager. Its device, which is installed on homes next to the water main entrance, measures how much water is used and where it is used throughout the home, alerting homeowners to leaks and other wasted water.

InnovateHER competition:

Date: December 1, 2015
Participants: 11
Location: Nextspace, 100 Cooper St., Santa Cruz, CA
