

EASILY IMMERSIVE

Project Summary

We will make a heads up display that aids communication between members of the firefighter team and give them access to important data. This heads-up-display that includes solutions for visibility, telemetry, pump truck issues, ladder truck issues and route mapping.

Participant Summary

- The team participants are members of the Eon Reality-Lehman College Virtual Reality Lab. All team members are actively involved in making VR/AR applications and have programming, art and additional skills required for excellent VR/AR experiences.

Technical Outcome

- Our approach will give firefighters continuous access to important data and communication tools that will increase safety for firefighters.
