U.S. Department of Commerce

To whom it may concern,

FPV Australia and Mongrel Gear are forerunners in the UAV industry. In 2013, we were officially recognized by CASA to provide manufacturer type training for multicopters and then in 2014, we opened one of the first CASA approved Training Organisations dedicated to RPAS education - one of the first in the country, and the world. Our instructors include ex-military instructor pilots and commercial airline pilots, who are also highly skilled drone pilots.

We have known the SOAPdrones team for over two years now and were delighted to train their team to obtain their commercial remote pilot's license. We also have developed a friendship with the team and are very excited to see some of the drone technology that they are working on.

We are pleased to write this letter of support and look forward to seeing what they can achieve with the Unmanned Aerial Systems Flight and Payload Challenge.

Feel free to contact us if you would like further information.
