Indicator

## THE PROBLEM

# COMPROMISED SAFETY

There is no way to effectively indicate, communicate, and analyze safety information on the jobsite.

## CURRENT ON-SITE COMMUNICATION METHODS

Expensive

Time Consuming

Ineffective & Outdated

# 22 MILLION

Americans are  
occupationally exposed to  
hazardous noise daily.

# THE SOLUTION

Heads Up crews are trained to respond to color pattern notifications with corresponding safety procedures.

## HEARING LOSS PREVENTION

The Heads Up display notifies workers when they are approaching an acoustically hazardous environment.

## TWO WAY COMMUNICATION

Instant two-way communication with everyone on your job site with user-friendly state-of-the-art technology.

## EMERGENCY NOTIFICATIONS

Send notifications in an instant to inform everyone on site of any hazardous change to their environment.

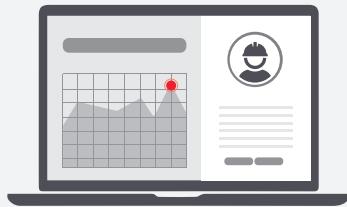

# STOP LIGHT SIMPLICITY

## THE HEADS UP INDICATOR

Enables instant communication between operators, safety crews, management teams and life saving sensory technology.

*A low profile, lightweight device that is mountable to any eye or face protection.*

## THE HEADS UP DASHBOARD

Heads Up Dashboard gives site safety leaders a real time overview of environmental hazards.

**\$20** /mo.  
PER USER
