To the administrators of the Provider User-Experience Challenge,

I am the director of the Medical Intensive Care Unit at the Hospital of the University of Pennsylvania. I have worked with David Do, Katherine Choi, and Eugene Gitelman on a number of projects in the past. Their designs for a real-time clinical awareness and quality dashboard is very timely, and I can see it impacting the quality of care immediately. I fully support their efforts and will give programmatic access to any electronic systems that they need. I plan to deploy and pilot this in my ICU as soon as it is ready.

Sincerely.

Barry D. Fuchs, MS, MD

Associate Professor of Medicine, Perelman School of Medicine at the University of Pennsylvania
