Accessing Voyager

[Voyager Search](#) is pleased to present the NGA Data Depot, our Stage 1 demonstration showing how Voyager meets the needs outlined in NGA's Disparate Data Challenge. The NGA Data Depot is built exclusively on our innovative COTS solution, Voyager. The site can be accessed at this URL: [voyagerdemo.com/ngaddc1](#).

We have also provided a 4-minute video that walks through how to use this application and highlights key features. It can be found on YouTube at: https://youtu.be/tztPjYswlCY

NGA Data Depot User Roles

To access the site, you will first need to login. The solution and the content it contains are protected by a role-based security. Challenge judges can access the NGA Data Depot through accounts that have been created on your behalf.

1. Analyst — Ten analyst user roles have been provided for accessing our submission, each with a username of "analyst1" through "analyst10." All users have the same password "datachallenge". If additional logins are required, please contact us using the information below.

Login	Password
analyst1	datachallenge
analyst2	datachallenge
analyst3	datachallenge
analyst4	datachallenge
analyst5	datachallenge
analyst6	datachallenge
analyst7	datachallenge
analyst8	datachallenge
analyst9	datachallenge
analyst10	datachallenge

Enter one of the login shown above on this page.

2. Administrator — The Administrator role manages all elements of Voyager from indexing configuration, security and user interface configuration. The Voyager Search team used the role to configure the software for our challenge submission. We have not provided a login; however, if you are interested we will be happy to provide a demonstration of these administration tools.

If you have any questions please contact us at ngachallenge@voyagersearch.com
